

SMM Exhibition 26-29 September

SigmaKalon Marine & Protective Coatings will be present at the 22nd Shipping, Machinery & Marine Technology International Trade Fair (SMM) in Hamburg this month from the 26th to 29th. With 42,000 visitors and more than 1,400 exhibitors from over 100 countries, SMM Hamburg brings together the biggest names in shipbuilding and marine technology for the biggest event of its kind.

The focus will be on **SigmaGlide**, a leading biocide-free fouling release product available to the marine market. SigmaGlide is the result of diligent research by our team of highly trained chemists and is the environmentally-friendly solution to combat the fouling problem.

As well as SigmaGlide, numerous other products such as SigmaCover 350, Sigma PhenGuard and SigmaPrime will also be on display, demonstrating the advanced technology SigmaKalon offers the international marine market.

With friendly and helpful staff on hand to offer advice, visitors to the SigmaKalon stand can expect nothing but the best.

Three new halls now form part of the trade fair grounds, with an additional eleven halls offering 84,000 square metres of exhibition area. This is the result of the massive increase in registrations, as *countries* such as New Zealand, Bangladesh and the United Arab Emirates make their first appearance in Hamburg this year.

Anyone wishing to contact our sales representatives should make their way to the SigmaKalon stand, **08.EG.300**, for more advice regarding the products and services we offer.
